SKILLS

Languages : Java, Python, C, C++, JavaScript, Bash/Shell
DevOps & Infra : Docker, GitHub Actions, Linux, Git/GitHub, CI/CD Pipelines
Backend & Frameworks : Spring Boot, REST APIs, Flask, Maven
Frontend : HTML, CSS, JavaScript
Databases & ML : MySQL, TensorFlow, Keras, OpenCV, Scikit-learn
Tools : VS Code, Eclipse IDE, PyCharm, GitHub, Google Workspace, MS Office

PROJECTS

Student Management System | *Spring Boot, Java, REST API, MySQL, Maven*

- Built a full-stack CRUD web app with RESTful APIs to manage student and branch records with dynamic sorting and pagination.
- Designed modular Maven build structure enabling reproducible, pipeline-ready backend architecture with clean separation of layers.
- Integrated REST endpoints with a responsive HTML/CSS frontend; applied OOP principles and relational DB schema design.

House Price Prediction System | *Python, Flask, Scikit-learn, ML Pipeline*

- Designed an end-to-end ML pipeline covering data preprocessing, feature engineering, and model training using Scikit-learn.
- Deployed the trained model as a REST API via Flask, enabling real-time price predictions through an interactive web interface.
- Structured the codebase with reproducible scripts and modular components, mirroring DevOps automation and IaC best practices.

Plant Disease Detection using CNN | *Python, TensorFlow, Keras, OpenCV*

- Built a CNN-based image classification system to detect plant diseases from leaf images using TensorFlow and Keras.
- Implemented data augmentation, preprocessing pipelines, and model evaluation metrics to improve classification accuracy.
- Developed a real-time inference UI with OpenCV for live image capture and diagnosis with structured, reproducible training workflows.

Resume Builder Web Application | *HTML, CSS, JavaScript*

- Developed a fully client-side resume builder with real-time preview, customizable section layouts, and dynamic content editing.
- Implemented print-to-PDF export functionality and responsive design without any backend dependency or external libraries.
- Focused on intuitive UX flows and modular component design, applicable to internal developer platform and self-service tooling.

EDUCATION

Centre for Development of Advanced Computing (CDAC)

PG-DAC – Post Graduate Diploma in Advanced Computing

2025 – Ongoing
Bangalore, Karnataka

Institute of Technology and Management, Gwalior

B.Tech – Computer Science and Engineering | CGPA: 7.37

2021 – 2025
Gwalior, MP

CERTIFICATIONS & ACHIEVEMENTS

Google Cybersecurity Professional Certificate | *Google / Coursera* | [Verify](#)

- 9 courses: Linux, SQL, SIEM, IDS, risk management, network security, Python automation for cybersecurity.

Nov 2025

Wipro TalentNext – Java Full Stack | *Wipro (DICE ID Verified)*

- Digital Skills Readiness Program: Core Java, OOP, Data Structures, Full Stack Web Development.

Oct 2024

Salesforce Developer Virtual Internship | *Salesforce*

- Apex, LWC, APIs, Process Automation; earned Super Badges: Apex Specialist, Process Automation Specialist.

Jul 2024

Python Web Dev – Infosys Finishing School | *ICT Academy*

- 100-hour program: Python, Flask, web development, and professional soft skills.

Oct 2024

Cambridge BEC Preliminary (B1) | *Cambridge English – Score: 145*

- Business English certified at B1 level; assessed in Reading, Writing, Listening, and Speaking.
